REQUEST FOR RECONSIDERATION OF PETITION
DECISION REGARDING RENEWED PETITION

Sir:

Applicants respectfully request reconsideration of the Petition Decision mailed on June 25, 2008. In this decision the PCT Legal Examiner indicated that the Petition Under 37 CFR 1.497(d) and under 1.137(b) was incomplete based on the apparent failure of Applicants to satisfy MPPEP 1893.01(e) (C) which requires the written consent of the assignee if an assignment has been executed by any of the original named inventors. The Petition notes that a statement under 37 3.73(b) was filed on April 26, 2006 but an Assignment did not accompany this submission as referenced in the 3.73(b) Statement.

In response thereto Applicants respectfully note that no Assignment was submitted and also note that this 3.73(b) Statement was referring to an Assignment document submitted on May 2, 2005 in US Serial No. 10/887,233 which utility application was filed on even date (July 9,

2004) as the PCT application PCT/US2004/021853 and which utility application claims priority to the same provisional application, US Serial No. 60/485,745, filed on July 10, 2003, to which the PCT on which this national phase application claims priority. Applicants further note that the specification, figures and claims of the as-filed national phase application, US Serial No. 10/563,758 are identical to those in US Serial No. 10/887,233 and that this application was filed with a Petition as herein adding Bryan Moyer as an inventor and that the Petition was granted.

In response to the failure to submit the referenced Assignment, Applicants submit herewith a copy of the Assignment and Statement by the Assignee submitted in US Serial No. 10/887,233 (Appendix A) and request that these documents be found acceptable to satisfy the omitted item set forth in Section III of the Petition decision. Applicants request this assignment be accepted since this Assignment was signed by all of the inventors for an application having the same effective filing date, containing the identical specification, priority claim and which relates and claims the identical invention and subject matter. With respect thereto, this Assignment states that it covers all continuations, divisionals, extensions and the inventors acknowledge that the assignment covers "all right, title and interest for the United States, territories and possessions for the invention set forth in US Serial No. 10/887,233". This statement and Assignment of rights to Senomyx by all of the inventors should be acceptable herein since the identical invention (based on identical inventors, specification, figures, claims and effective filing date) is being claimed herein. This finding is further consistent with the Statement in US Serial No. 10/887,233 wherein the Assignee Senomyx Inc. indicated that this Assignment covered "the invention covering the subject matter of US Serial No. 10/887,233" (since it is based on the identical subject matter as in the subject application).

Alternatively, if the Assignment document submitted in 10/887,233 is found unacceptable to the subject application Applicants respectfully request that the requirement for the Assignment be waived for this application being deemed to be complete as the written consent of the Assignee according to MPEP 1893.01(c) is only required if an assignment document has been executed by the original inventors. Herein (if the assignment in 10/887,233 is deemed unacceptable) such an assignment was not executed by the original named inventors.

Based on the foregoing, Applicants respectfully submit that the Petition Decision should be granted and that this application should be transferred to the Technology Group for examination on the merits. This application is being submitted with a one-month extension. In the event that any further fees are deemed necessary, the Commissioner is authorized to charge the undersigned's Deposit Account No. 50-0206.

Respectfully submitted,
